He explores the range of experiences that lead to active bystandership, including socialization by parents, teachers (and peers) in childhood, education, experiential learning, and public education through media. He examines what personal characteristics or dispositions result from such experiences, which in turn lead to caring and helping. Staub also considers how circumstances influence people--both individuals and whole groups--and how they join with personal dispositions to determine whether people remain passive in the face of others' need or instead help others and behave in morally courageous or even heroic ways. He considers how moral and caring values can be subverted by circumstances, and outlines ways to resist that possibility. One of the key foundation books of the English Reformation, *The Obedience of a Christian Man* (1528) makes a radical challenge to the established order of the all-powerful Church of its time. Himself a priest, Tyndale boldly claims that there is just one social structure created by God to which all must be obedient, without the intervention of the rule of the Pope. He argues that Christians cannot be saved simply by performing ceremonies or by hearing the Scriptures in Latin, which most could not understand, and that all should have access to the Bible in their own language - an idea that was then both bold and dangerous. Powerful in thought and theological learning, this is a landmark in religious and political thinking. This is the extended and annotated edition including \* an extensive annotation of more than 10,000 words about the history and basics of Buddhism, written by Thomas William Rhys Davids *The Lotus Sūtra* is one of the most popular and influential Mahāyāna sūtras, and the basis on which the Tiantai and Nichiren schools of Buddhism were established. This sutra is known for its extensive instruction on the concept and usage of skillful means - the seventh paramita or perfection of a Bodhisattva - mostly in the form of parables. It is also one of the first sutras to use the term Mahāyāna, or "Great Vehicle", Buddhism. Another concept introduced by the Lotus Sutra is the idea that the Buddha is an eternal entity, who achieved nirvana eons ago, but willingly chose to remain in the cycle of rebirth (samsara) to help teach beings the Dharma time and again. A Zen Buddhist masterpiece, winner of the 2018 Thornton Wilder Prize for Translation. *The Platform Sutra* occupies a central place in Zen (Ch'an) Buddhist instruction for students and spiritual seekers worldwide. It is often linked with *The Heart Sutra* and *The Diamond Sutra* to form a trio of texts that have been revered and studied for centuries. However, unlike the other sutras, which transcribe the teachings of the Buddha himself, *The Platform Sutra* presents the autobiography of Hui-neng, the controversial 6th Patriarch of Zen, and his understanding of the fundamentals of a spiritual and practical life. Hui-neng's instruction still matters—the 7th-century school of Sudden Awakening that he founded survives today, continuing to influence the Rinzai and Soto schools of contemporary Zen. Red Pine, whose translations of *The Heart Sutra* and *The Diamond Sutra* have been celebrated and widely received, now provides a sensitive and assured treatment of the third and final sutra of the classic triumvirate. He adds remarkable commentary to a translation that, combined with the full Chinese text, a glossary, and notes, results in a Mahayana masterpiece sure to become the standard edition for students and seekers alike. Would you like to do your part in saving America? *Grass Roots* is a no-nonsense instruction manual that explains exactly what you can do. Scott Hennen—host and founder of the innovative Common Sense Club radio program—shows how everyday Americans just like you are making a difference for our country's future. This down-to-earth handbook gives you clear, practical, effective actions you can take to preserve the American dream for your children and grandchildren. President Ronald Reagan once said, "All great change in America begins at the dinner table." Today, most Americans struggle just to keep food on the dinner table. We are staggering under a crushing burden of big government, out-of-control spending, and towering federal debt. We have become tax slaves—and the people we sent to Washington to represent us are the very ones who sold us there. We're angry—and rightly so. But ruling-class politicians have shrugged off our grassroots anger, calling it "Astroturf." We're tired of being ignored, patronized, and lied to by the very people who are supposed to be our "public servants." Not since the original Boston Tea Party of 1773 have so many everyday Americans participated in such a significant display of righteous indignation and freedom-loving patriotism. For the first time in generations, ordinary hardworking, church-going Americans are carrying signs, gathering in large numbers, and making their voices heard. Big government, beware. A sleeping giant has awakened. Scott Hennen has drawn up a practical blueprint for change, a handbook for all of us who are ready to roll up our sleeves and do our part to restore America's goodness—and greatness. *Grass Roots* is a political manifesto for every American who loves liberty and cares enough to get involved. This book explores the roots of goodness and evil by gathering together the knowledge gained in a lifelong study of harmful or altruistic behavior. Ervin Staub has studied what leads children and adults to help others in need and how caring, helping, and altruism develop in children; bullying and youth violence and their prevention; the roots of genocide, mass killing, and other harmful behavior between groups of people; the

prevention of violence; healing victimized groups and reconciliation between groups. He presents a broad panorama of the roots of violence and caring and how we create societies and a world that is caring, peaceful, and harmonious. Evolution, Games, and God explores how cooperation and altruism, alongside mutation and natural selection, play a critical role in evolution, from microbes to human societies. Inheriting a tendency to cooperate and self-sacrifice on behalf of others may be as beneficial to a population's survival as the self-preserving instincts of individuals. This book closely examines one relatively small but significant political phenomenon OCo Suku in Revolutionary China through a matrix of western social theory: Freud, Marcuse, Arendt, and Ricoeur. Suku is the practice of confessing individual suffering in a political context and in a collective public forum. By interpreting Suku from the joint perspectives of political identity and subjective psychological identity, the aim of the book is to postulate a new paradigm for discussing social suffering and collective confession in a political context that represents the radical transformation in China's modern history. This book presents an analysis of the transformation of identity from the traditional to the modern, both for the individual peasant and for the state of China. One Of The Foremost Texts Of The Mahayana Tradition. This catalogue describes the 2500 Khotanese manuscripts in the British Library's Aurel Stein and other Central Asian collections, including Buddhist and secular texts that enhance our understanding of northern Mahayana (as well as Vajrayana at Dunhuang) and the history of the southern Silk Road in the 5th-10th centuries. It includes a comprehensive introduction to the collections and the historical background of the manuscripts. A milestone in the study of value in human life and thought, written by one of the world's preeminent living philosophers The Moral Powers: A Study of Human Nature is a philosophical investigation of the moral potentialities and sensibilities of human beings, of the meaning of human life, and of the place of death in life. It is an essay in philosophical anthropology: the study of the conceptual framework in terms of which we think about, speak about, and investigate homo sapiens as a social and cultural animal. This volume examines the diversity of values in human life and the place of moral value within the varieties of values. Its subject is the nature of good and evil and our propensity to virtue and vice. Acting as the culmination of five decades of reflection on the philosophy of mind, epistemology, ethics, and human nature, this volume: Concludes Hacker's acclaimed Human Nature tetralogy: Human Nature: The Categorical Framework, The Intellectual Powers: A Study of Human Nature, and The Passions: A Study of Human Nature Discusses traditional ideas about ethical value and addresses misconceptions held by philosophers, psychologists, and cognitive neuroscientists The Moral Powers: A Study of Human Nature is required reading philosophers of mind, ethicists, psychologists, cognitive neuroscientists, and any general reader wanting to understand the nature of value and the place of ethics in human lives. — What people worry about can often be summarized into three categories: family, business, and relationships. Greed and desire are often the root cause of people's worries. People tirelessly pursue fame and fortune, material goods, family love, and romantic relationships, yet they completely forget that they live in the human world, where one cannot have everything as one wishes! This book compiled questions and responses over the years between Dharma Master Cheng Yen and disciples or visitors: the questions may be about faith, suffering of illness, managing wealth, managing the household, etc. The words in this book will inspire people to bring out their inherent wisdom and learn to have fewer desires, so they will be able to live peaceful lives. The book analyses new perspectives and challenges for the development of tourism and hospitality in emerging international destinations, based on Iran as a heritage destination. nuances, your own relationship with God will be enriched as you gain an in-depth understanding of their meanings. Leading scientists, psychologists and science writers offer a collection of personal stories and empirical research that reflect on and explore the perspective-changing science of human goodness. Original. First published in 2002. This is Volume X of twelve in the Library of Philosophy series on Ethics. Written in 1927, this book presents a study in the Coherence Theory of Goodness and looks at areas of will and its context, self and self-knowledge, the world and self and develops into the will as immediate and as individual. The book ends on will as both moral and social. It looks at goodness on two main sides The first is that goodness has its roots in the spiritual activity called willing; that it belongs to things, not in themselves, but as objects of some kind of willing. The second is that goodness belongs to the coherent will; that different kinds of goodness, whether in actions or in things, are due to the different kinds of coherence in the will which wills them; and that moral goodness in particular belongs to a will which is coherent as a member of an all-inclusive, society of coherent wills. Finding Our True Home presents a new definitive translation of the Amitabha Sutra along with Thich Nhat Hanh's first commentary on one of the most practiced forms of Buddhism in the world, the Pure Land school. Introduced in the Buddha's own lifetime, Pure Land practice puts us in touch with the beauty in our own world and brings us the security, solidity, and freedom we need in order to truly enjoy it. Realizing that Buddha is within us, we see that the Pure Land (paradise) is here and now, rather than in the future. Finding Our True Home will open a new Dharma door to many students of meditation. Presents instructions, meditation guides, quotations, letters, essays, dialogues, and other writings by Zen masters over the centuries that were translated and published over a period of thirty years. The Meaning of Life and the Great Philosophers reveals how great philosophers of the past sought to answer the question of the meaning of life. This edited collection includes thirty-five chapters which each focus on a major philosophical figure, from Confucius to Rorty, and that imaginatively engage with the topic from their perspective. This volume also contains a Postscript on the historical origins and original significance of the phrase 'the meaning of life'. Written by leading experts in the field, such as A.C. Grayling, Thaddeus Metz and John Cottingham, this unique and engaging book explores the relevance of the history of philosophy to contemporary debates. It will prove essential reading for students and scholars studying the history of philosophy, philosophy of religion, ethics, metaphysics or comparative philosophy. Grab a copy for a friend and share the journey together! An unprecedented passion for saving lives swept through late Ming society, giving rise to charitable institutions that transcended family, class, and religious boundaries. Analyzing lecture transcripts, administrative guidelines, didactic tales, and diaries, Joanna Handlin Smith abandons the facile explanation that charity was a response to poverty and social unrest and examines the social and economic changes that stimulated the fervor for doing good. With an eye for telling details and a finesse in weaving the voices of her subjects into her narrative, Smith brings to life the hard choices that five men faced when deciding whom to help, how to organize charitable distributions, and how to balance their communities' needs against the interests of family and self. She thus shifts attention from tired questions about whether the Chinese had a tradition of charity (they did) to analyzing the nature of charity itself. Skillfully organized and engaging, The Art of Doing Good moves from discussions about moral leadership and beliefs to scrutiny of the daily operation of soup kitchens and medical dispensaries, and from examining local society to generalizing about the just use of resources and the role of social networks in charitable giving. Smith's work will transform our thinking about the boundaries between social classes in late imperial China and about charity in general. #1 New York Times Bestseller and winner of the Pulitzer Prize, reissued to coincide with History Channel's new event series "A dazzlingly erudite synthesis of history, philosophy,

anthropology, genetics, sociology, economics, epidemiology, statistics, and more" (Frank Bruni, *The New York Times*), *Blueprint* shows why evolution has placed us on a humane path -- and how we are united by our common humanity. For too long, scientists have focused on the dark side of our biological heritage: our capacity for aggression, cruelty, prejudice, and self-interest. But natural selection has given us a suite of beneficial social features, including our capacity for love, friendship, cooperation, and learning. Beneath all of our inventions -- our tools, farms, machines, cities, nations -- we carry with us innate proclivities to make a good society. In *Blueprint*, Nicholas A. Christakis introduces the compelling idea that our genes affect not only our bodies and behaviors, but also the ways in which we make societies, ones that are surprisingly similar worldwide. With many vivid examples -- including diverse historical and contemporary cultures, communities formed in the wake of shipwrecks, commune dwellers seeking utopia, online groups thrown together by design or involving artificially intelligent bots, and even the tender and complex social arrangements of elephants and dolphins that so resemble our own -- Christakis shows that, despite a human history replete with violence, we cannot escape our social blueprint for goodness. In a world of increasing political and economic polarization, it's tempting to ignore the positive role of our evolutionary past. But by exploring the ancient roots of goodness in civilization, *Blueprint* shows that our genes have shaped societies for our welfare and that, in a feedback loop stretching back many thousands of years, societies are still shaping our genes today. The roots of all goodness lie in the soil of appreciation for goodness.

Small daily diary / journal / notebook to write in, for creative writing, for creating lists, for Scheduling, Organizing and Recording your thoughts. Makes an excellent gift idea for birthdays, Christmas or any special occasion. Perfectly sized at 6" x 9" 120 page Softcover bookbinding Flexible Paperback "Goodness on Deposit - The Ginormous Tiny Idea" is the first in a series of books which promote a child's awareness of other's needs and demonstrates practical ways for children to make a difference in the life of a friend, neighbor or family member. It is a sweet interactive story which teaches children, through M.T.'s journey, to identify acts of kindness that need doing and record them in their Goodness on Deposit bankbook which is outlined in the book. M.T., our 8 year old main character very much admires his mother because she is kind and loving to others and possesses what he believes to be a "heart of gold". A small seed of an idea begins to percolate in M.T.'s head. He has a vision where he, along with his buddies, would open up a Goodness on Deposit Bank where children like himself would deposit their good deeds until they reach a balance which would earn them a heart of gold. Some books on mysticism offer New Age syncretism. Others propose simplistic methods of producing spiritual experiences. Still others deconstruct religious experience. *The Roots of Christian Mysticism* by Oliver Clement, however, avoids these pitfalls. Clement presents the mysticism of the early fathers themselves, from whose writings he offers exceptionally rich selections that are not readily available. In so doing, he introduces the reader to Christian mysticism through the words of those who were "drunk with God," but whose religious experience was firmly rooted in Christ. Most importantly, given the modern propensity for bogus spirituality, Clement shows the indissoluble unity between mysticism and doctrine. The Fathers speak doctrine in voices radiant with the dark vision of God and their doctrine is both the fruit of prayer and the form of spirituality. From this perspective, the Church's teachings about God, Christ, Church, Sacrament and Christian vocation become the objects of contemplation and the personal quest for God finds its way within, not apart from the Church, ecclesia. Christian mysticism, therefore, always occurs within the womb of the Church, particularly within the locus of the liturgy and thus, is prevented at the outset from becoming merely a freewheeling and self-authenticating form of emotional exuberance. Mysticism, thus firmly rooted, is considered the normal spiritual life of all Christians. All the faithful are called to realize fully the grace of their baptism, that is, to fulfill their humanity by being divinized through grace. These words might be disconcerting or raise the specter of "enthusiasm," but some proper understanding of this calling, however embryonic, is indispensable to spiritual growth, to the life of the Church and to the transformation of culture. Why, for example, when so many Americans claim to be Christian does their faith have so little impact on our culture? Or why are the Church's moral teachings found to be so excessively burdensome? Perhaps Christians have seldom been directed toward a spirituality that would open them to a fuller vision of their true destiny in Christ. A recent classroom experience illustrates the point. A young Christian father of two vigorously proposed many practical reasons for

using contraception. His understanding of fatherhood operated on a purely naturalistic level; his concern to provide for his children likewise revolved around material goods. But once he glimpsed the ultimate destiny in Christ to which he and his children were called, he saw his fatherhood as a participation in a sacred mission and trust. Only then did the Church's teaching and the sacrifices it entails make sense enough to follow. Such illumination is an essential component in the birth of mystical life from which, for the fathers, the moral life flows. To use Clement's terms, "only when the beauty-goodness of the truth captures the spirit-heart is the person able to engage in Christian praxis and to make the sacrifices necessary not merely to be good but to be transformed into Christ." This transformation entails strenuous spiritual combat with a fallen human nature that the Fathers understand with exquisite perception. But even here the patristic thrust is basically positive, an attraction to the beauty and goodness of God that calls forth virtue, rather than an emphasis on the direct destruction of sin. Clement aptly describes asceticism as "an awakening from the sleep-walking of daily life. It enables the Word to clear the silt away in the depth of the soul, freeing the spring of living waters.... It is the Word who acts but we have to co-operate with him, not so much by exertion of will-power as by loving attentiveness." Although spiritual growth naturally encompasses the activities of prayer, fasting and so forth, Clement never discusses this apart from Christ and Trinity. Salvation is not achieved through Pelagian self-development but in Christ and through his Church. The Fathers' theological center prevents their mysticism from collapsing into self-centered or naturalistic forms. The beauty that attracts is never separated from her sisters truth and goodness. *The Roots of Christian Mysticism* needs to be read by Christians seeking spiritual depth and by anyone wanting to taste doctrine as a living word. It is an excellent introduction to patristic thought and offers not only extensive selections of their writings but an appendix of about seventy pages of biographical material. Only one criticism of the book is offered: references to modern writers need to be noted so the reader can pursue them. Otherwise, this book is a gem. Jerrilyn Szelle *Crisis* April, 1996 By far one of the most important objects of worship in the Buddhist traditions, the bodhisattva Avalokitesvara is regarded as the embodiment of compassion. He has been widely revered throughout the Buddhist countries of Asia since the early centuries of the Common Era. While he was closely identified with the royalty in South and Southeast Asia, and the Tibetans continue to this day to view the Dalai Lamas as his incarnations, in China he became a she—Kuan-yin, the "Goddess of Mercy"—and has a very different history. The causes and processes of this metamorphosis have perplexed Buddhist scholars for centuries. In this groundbreaking, comprehensive study, Chün-fang Yü discusses this dramatic transformation of the (male) Indian bodhisattva Avalokitesvara into the (female) Chinese Kuan-yin—from a relatively minor figure in the Buddha's retinue to a universal savior and one of the most popular deities in Chinese religion. Focusing on the various media through which the feminine Kuan-yin became constructed and domesticated in China, Yü thoroughly examines Buddhist scriptures, miracle stories, pilgrimages, popular literature, and monastic and local gazetteers—as well as the changing iconography reflected in Kuan-yin's images and artistic representations—to determine the role this material played in this amazing transformation. The book eloquently depicts the domestication of Kuan-yin as a case study of the indigenization of Buddhism in China and illuminates the ways this beloved deity has affected the lives of all Chinese people down the ages. Herbert McCabe was one of the most original and creative theologians of recent years. Continuum has published numerous volumes of unpublished typescripts left behind by him following his untimely death in 2001. This book is the sixth to appear. McCabe was deeply immersed in the philosophical theology of St Thomas Aquinas and was responsible in part for the notable revival of interest in the thought of Aquinas in our time. Here he tackles the problem of evil by focusing and commenting on what Aquinas said about it. What should we mean by words such as 'good', 'bad', 'being', 'cause', 'creation', and 'God'? These are McCabe's main questions. In seeking to answer them he demonstrates why it cannot be shown that evil disproves God's existence. He also explains how we can rightly think of evil in a world made by God. McCabe's approach to God and evil is refreshingly unconventional given much that has been said about it of late. Yet it is also very traditional. It will interest and inform anyone seriously interested in the topic.
